PROFESSIONAL SUMMARY

Odoo Developer with 2 years of experience building and customising Odoo modules across Odoo 14 to 19 for trade finance, distribution, manufacturing and eCommerce clients. Specialises in third-party integration built on Odoo's native provider frameworks rather than beside them, so a single integration survives version upgrades. Works end to end in Python, PostgreSQL, XML, JavaScript and OWL: an end-to-end letters of credit system, bank-specification QWeb PDF reporting, payment and courier gateways, and Website Sale and Portal customisation.

PROFESSIONAL EXPERIENCE

Odoo Developer

Dec 2024 - Present

MountSol - Lahore, Pakistan

- Delivered 10 production Odoo deployments for 7 clients** across Odoo 14 to 19, spanning trade finance, distribution, manufacturing and eCommerce.
- Designed and delivered an end-to-end letters of credit and trade finance system** for a commodities trading client, integrating 5 core Odoo modules: Sales, Purchase, Inventory, MRP and Accounting.
- Built 15+ XLSX and QWeb PDF reports** and an LC analytics dashboard, producing banking document suites to the banks' own pixel-level layout specifications.
- Integrated the Safepay payment gateway** on Odoo's native payment.provider framework, covering session creation, payment status, refunds and HMAC-SHA256 webhook verification.
- Registered courier services as native Odoo delivery carriers** with rate quoting, booking, tracking and cancellation, and maintained the integration across 4 Odoo versions (16 to 19).
- Developed a WhatsApp Cloud API integration for Odoo Community** on Meta's Graph API, delivering two-way messaging in Discuss, template synchronisation with live approval status, and a chatbot with a visual script builder.

PROJECTS

Letters of Credit & Trade FinancePSAE Multi Trade Group

Odoo 18

Import and export letters of credit end to end, wired into Sales, Purchase, Inventory, MRP, Accounting, Documents and Calendar. Bank-wise and LC-wise analytics dashboard, and 15+ pre-formatted reports covering shipment tracking, receivables aging, PDC lists, cheque discounting and export LC outstanding, plus a CRM to R&D to QC approval workflow and location-wise stock reporting.

QWeb PDF | XLSX | Accounting | MRP | custom A4 formats

WhatsApp Cloud API IntegrationMountSol product

Odoo 19

Community-edition integration with Meta's official WhatsApp Cloud API, extended past the Enterprise offering. Inbound messages arrive as Discuss channels so agents reply from the ordinary Odoo inbox; template management syncs and submits templates to Meta with live status over webhook; an interactive chatbot routes conversations to CRM leads, Helpdesk tickets or a human operator.

Meta Graph API | HMAC webhooks | Discuss | multi-company

B2B eCommerce PlatformGL Distribution

Odoo 18

A one-page checkout collapsing cart review, address, delivery carrier and payment onto a single screen. A promotional popup captures storefront leads into CRM through a secured controller endpoint. Per-line pricelists price each quotation line differently, with a Google Merchant Center product feed.

HTTP controllers | SCSS theming | CRM | QWeb | product data feed

Container Logistics eCommerce Farhiell

Odoo 17

Shipping containers selected dynamically from cart weight and volume. A custom container model carries capacity, cost, weight and volume constraints, UoM-aware totals roll up at order and line level, and a cart-update JSON endpoint recalculates the cart with no page reload.

Website Sale | JSON controllers | UoM conversion | procurement rules

Additional Projects

Odoo 16 to 19

Amazon S3 connector with two-way file sync over boto3, an OWL dashboard and a branded QWeb PDF suite (DRWE, Odoo 18). Safepay hosted checkout, published as an open-source reference implementation at github.com/itxshahzeb/odoo-payment-provider-starter. Barcode-driven asset tracking on stock lots with compliance reporting (TronicaHub, Odoo 17). Slack and Odoo Project sync (Odoo 19). XML inventory integration and an HR leave portal (Monamosa, Odoo 18).

TECHNICAL SKILLS

PROGRAMMING Python, JavaScript, XML, SQL, HTML, CSS/SCSS

ERP Odoo 14, 15, 16, 17, 18, 19 (Community and Enterprise), module development, customisation, version migration

ODOO FRAMEWORK ORM, model inheritance, computed & stored fields, constraints, wizards, scheduled actions, record rules & access control, unit testing

ODOO WEB Website Sale, Portal, HTTP & JSON controllers, QWeb templates & PDF reports, OWL components, XLSX generation

INTEGRATIONS REST APIs, webhooks, HMAC verification, OAuth 2.0, JSON-RPC, XML-RPC, Meta Graph API, Amazon S3 (boto3), payment.provider, delivery.carrier

MODULES Sales, Purchase, Inventory, Accounting, MRP, CRM, HR, Point of Sale, Website, Helpdesk

DATABASES & TOOLS PostgreSQL, Git, GitHub, Linux, Visual Studio Code

PROFESSIONAL Requirement gathering, code review, technical documentation, cross-functional collaboration

EDUCATION

Bachelor of Science in Computer Science

2020 - 2024 CGPA 3.09

University of Science and Technology, Bannu

LANGUAGES

SPOKEN English (professional working proficiency), Urdu (native)
